

Question Paper Name: M Sc Nursing
Subject Name: M.Sc Nursing
Duration: 90

Display Number Panel: Yes
Group All Questions: No

Question Number : 1 Question Id : 480915201 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The only movable bone of the skull is

Options :

1. Maxilla
2. Mandible
3. Temporal bone
4. Frontal bone

Question Number : 2 Question Id : 480915202 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The Duodenum is divided into

Options :

1. Two parts
2. Three parts
3. Four parts
4. Five parts

Question Number : 3 Question Id : 480915203 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The internal lining of trachea has a membrane of

Options :

1. Ciliated endothelium
2. Squamous epithelium
3. Connective tissue cell
4. Mucous cells

Question Number : 4 Question Id : 480915204 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The amount of air remaining in the lungs after maximal expiration is called

Options :

1. Tidal Volume

2. Supplemental air
3. Complementary air
4. Residual air

Question Number : 5 Question Id : 480915205 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

All of the following are the properties of hormones except:

Options :

1. Low molecular weight
2. Easily soluble
3. Easily stored anywhere in the body
4. Easily diffuse out of the blood vessels

Question Number : 6 Question Id : 480915206 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Parathyroid hormone

Options :

1. Is produced by thyroid gland
2. Is released when blood calcium levels fall
3. Stimulates osteoblasts to lay down new bone
4. Stimulates calcitonin release

Question Number : 7 Question Id : 480915207 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Molisch test is to be done to detect

Options :

1. Fats
2. Carbohydrates
3. Minerals
4. Proteins

Question Number : 8 Question Id : 480915208 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Niacin deficiency leads to the clinical condition called

Options :

1. Scurvy
2. Rickets
3. Pellagra
4. Beri-Beri

Question Number : 9 Question Id : 480915209 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Two monosaccharide units formed these carbohydrates joining by glycoside linkages except:

Options :

1. Starch
2. Lactose
3. Sucrose
4. Maltose

Question Number : 10 Question Id : 480915210 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which one of the following is NOT the anthropometric measurement used as an indicator of nutritional status?

Options :

1. Measurement of height and weight
2. Head and chest circumference in young children
3. Abdomen circumference
4. Skin fold thickness and arm circumference

Question Number : 11 Question Id : 480915211 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which of the following nutrients is required in greater quantity by girls as compared to boys of the 10-12 year age group?

Options :

1. Fat
2. Calcium
3. Iron
4. Retinal

Question Number : 12 Question Id : 480915212 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which of the following is the richest source of potassium (1500-2000mg)

Options :

1. Leafy vegetables
2. Coffee, tea and cocoa
3. Lentils
4. Dry Peas

Question Number : 13 Question Id : 480915213 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Measles vaccine is administered by

Options :

1. Intradermal route
2. Intravenous route
3. Oral route
4. Subcutaneous route

Question Number : 14 Question Id : 480915214 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Quarantine stands for

Options :

1. Time period between infection and confirmatory diagnosis
2. Time period between diagnosis and initiation of treatment
3. Time period between infection and multiplication of organism
4. Longest incubation period

Question Number : 15 Question Id : 480915215 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Father of epidemiology is

Options :

1. John Snow
2. Joseph Lister
3. Karl Landsteiner
4. Robert Hook

Question Number : 16 Question Id : 480915216 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

An infection which is present in an individual but not sufficient to result in a disease is called as

Options :

1. Latent infection
2. Subclinical infection
3. Secondary infection
4. Clinical infection

Question Number : 17 Question Id : 480915217 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Chairman of Mudaliar Committee was

Options :

1. Rajaswamy
2. Rajendra Prasad
3. Dr. A. Lakshman Swamy
4. Dr. B. Ramaswamy

Question Number : 18 Question Id : 480915218 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Urban health services are administered by

Options :

1. District
2. State
3. Municipality
4. Centre

Question Number : 19 Question Id : 480915219 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Sentinel Surveillance is used to

Options :

1. Know the total number of affected people
2. Know the hidden cases in the community
3. Compare the previous year incidence with present year incidence
4. Measure incidence and prevalence

Question Number : 20 Question Id : 480915220 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

LAMA stands for

Options :

1. Leave application for medical advice
2. Left against medical advice
3. Limited access to medical advice

4. Last admission for medical area

Question Number : 21 Question Id : 480915221 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which one of the following interventions can best prevent bed sore?

Options :

1. Massage reddened areas with lotion or oils
2. Change the position every hourly
3. Use special water mattress
4. Keep skin clean and dry

Question Number : 22 Question Id : 480915222 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

While measuring central venous pressure the zero point of the manometer is adjusted to

Options :

1. Anterior axillary line
2. Mid axillary line
3. Posterior axillary line
4. Shoulder level

Question Number : 23 Question Id : 480915223 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The most appropriate time for the nurse to obtain a sputum specimen for the culture is

Options :

1. Early in the morning
2. After the patient eats a light breakfast
3. After aerosol therapy
4. After chest physiotherapy

Question Number : 24 Question Id : 480915224 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Lateral curvature of the spine is called as

Options :

1. Kyphosis
2. Lordosis
3. Scoliosis
4. Pectus Excavatum

Question Number : 25 Question Id : 480915225 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

While giving NG tube feeding which of the following nursing actions prevents complications?

Options :

1. Advance tube 2cm
2. Flush tube with 20ml of air
3. Provide high Fowler's position
4. Plug the airvent during feeding

Question Number : 26 Question Id : 480915226 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Pain in the calf with dorsiflexion of the foot is known as

Options :

1. Homan sign
2. Trousseau sign
3. Chvostek's sign
4. Kerning's sign

Question Number : 27 Question Id : 480915227 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Immunity against a particular pathogen is

Options :

1. Specific immunity
2. Species immunity
3. Racial immunity
4. Individual immunity

Question Number : 28 Question Id : 480915228 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Growth of microorganisms in the presence of oxygen

Options :

1. Aerobic
2. Anaerobic
3. Biotic
4. Synbiotic

Question Number : 29 Question Id : 480915229 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

An antidote for organo phosphorous poisoning is

Options :

1. Neostigmine
2. Succinyl Choline
3. Atropine
4. D. tubocurarine

Question Number : 30 Question Id : 480915230 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The common drug Aspirin is used in Myocardial infarction because it

Options :

1. Decreases thromboxane synthesis
2. Has analgesic action
3. Reduces cardiac work
4. Reduces prostaglandin synthesis

Question Number : 31 Question Id : 480915231 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The fluid would be the most appropriate for the client receiving Lasix and Lanoxin is:

Options :

1. Milk
2. Gatorade

3. Orange juice

4. Water

Question Number : 32 Question Id : 480915232 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Fixative used in histopathology is

Options :

1. Ethyl alcohol

2. Buffered neutral 10% formalin

3. Gluteraldehyde

4. Bovin's solution

Question Number : 33 Question Id : 480915233 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

An adult male client has undergone spinal surgery. Which of the following intervention is appropriate for this client?

Options :

1. Assess the client's feet for sensation and circulation

2. Encourage client to drink plenty of fluids

3. Long-roll the client to prone position

4. Observe the client's bowel movement and voiding patterns

Question Number : 34 Question Id : 480915234 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which of the following conditions is an early symptom of myasthenia gravis?

Options :

1. Dysphagia

2. Fatigue improving in the evening

3. Ptosis

4. Respiratory distress

Question Number : 35 Question Id : 480915235 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Pathology seen in Alzheimer disease is

Options :

1. Atrophy of Cerebral Cortex and Hippocampus

2. Atrophy of Cerebral Cortex and Pons

3. Atrophy of Hippocampus and Medulla Oblongata

4. Atrophy of Spinal cord and Cerebellum

Question Number : 36 Question Id : 480915236 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Method of removing of prostate gland through an abdominal incision is known as

Options :

1. Retro pubic prostectomy

2. Perineal prostectomy

3. Suprapubic prostectomy

4. Transurethral needle ablation

Question Number : 37 Question Id : 480915237 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Among the following, the most common cause of chronic renal failure is

Options :

1. Diabetes Mellitus
2. Systemic Inflammatory Diseases
3. Renal artery stenosis
4. Renal tubular adeno carcinoma

Question Number : 38 Question Id : 480915238 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which of the following listed drug is a proton pump inhibitor

Options :

1. Pantoprazole
2. Ranitidine
3. Sucralfate
4. Famotidine

Question Number : 39 Question Id : 480915239 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

CREST Syndrome is seen in B62

Options :

1. Progressive Systemic Sclerosis
2. Systemic Lupus Erythematosus
3. Gout
4. Rheumatoid arthritis

Question Number : 40 Question Id : 480915240 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Extra sensory perception (ESP) refers to perception without any sensory basis. Which of the following is NOT ESP?

Options :

1. Telepathy
2. Clairvoyance
3. Remonitions
4. Illusion

Question Number : 41 Question Id : 480915241 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The theory of classical conditioning was proposed by

Options :

1. BF Skinner
2. Max Wertheimer
3. Ivan Pavlov
4. Thorndike

Question Number : 42 Question Id : 480915242 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which of the following is a center for recent memory?

Options :

1. Temporal lobe
2. Parietal lobe
3. Hippocampus
4. Thalamus

Question Number : 43 Question Id : 480915243 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The primary aim of the applied nutrition programme in India is

Options :

1. Supply of protective foods at subsidized rates to vulnerable groups
2. Supply of protective foods free of costs to vulnerable groups
3. Stimulation of production and consumption of protective foods by education
4. Supply of protective foods free to all groups of people

Question Number : 44 Question Id : 480915244 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Seasonal trend means changes in diseases frequency

Options :

1. Over a period of less than 10 years
2. Over a period of more than 5 years
3. Over a period of less than 1 year
4. Over a period of more than 3 years

Question Number : 45 Question Id : 480915245 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Registration of birth should be done within

Options :

1. 10 days
2. 3 days
3. 21 days
4. 7 days

Question Number : 46 Question Id : 480915246 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The national family planning programme was started in

Options :

1. 1952
2. 1965
3. 1955
4. 1977

Question Number : 47 Question Id : 480915247 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

All the following are advantages of case control study except

Options :

1. Relatively easy to carry out
2. Involve few subjects
3. Be very expensive

4. Be suitable for rare diseases

Question Number : 48 Question Id : 480915248 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Immunization is which level of prevention?

Options :

1. Primary level prevention
2. Secondary level prevention
3. Tertiary level prevention
4. Primordial level prevention

Question Number : 49 Question Id : 480915249 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Demographic gap means

Options :

1. Difference between birth and death
2. Difference between age specific birth and death rates
3. Difference in sex-ratio
4. Difference in child: woman ratio

Question Number : 50 Question Id : 480915250 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

What is the denomination in general fertility rate?

Options :

1. Married women
2. Women in reproductive age group (15-44 years)
3. Married women in the age of 15 -44 years
4. All women

Question Number : 51 Question Id : 480915251 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which of the following is NOT a sampling techniques

Options :

1. Cluster
2. Random
3. Snowball
4. Cross over

Question Number : 52 Question Id : 480915252 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Normal position of the uterus is

Options :

1. Anteversion and anteflexion
2. Dorsiversion and dorsiflexion
3. Anteversion and dorsiflexion
4. Dorsiversion and anteflexion

Question Number : 53 Question Id : 480915253 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The connection between umbilical vein and inferior vena cava in the fetal life is known as

Options :

1. Umbilical artery
2. Ductus venosus
3. Ductus arteriosus
4. Pulmonary artery

Question Number : 54 Question Id : 480915254 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Striae gravidarum is the skin changes during pregnancy on

Options :

1. Face
2. Neck
3. Breast
4. Back

Question Number : 55 Question Id : 480915255 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

An anxiety disorder is

Options :

1. An emotional state identified by panic attacks
2. An emotional condition classified by excessive checking
3. Disordered thinking
4. An excessive or aroused state characterized by feelings of apprehension, uncertainty and fear

Question Number : 56 Question Id : 480915256 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Fear of an open space is called as

Options :

1. Social Phobia
2. Acrophobia
3. Agoraphobia
4. Nyctophobia

Question Number : 57 Question Id : 480915257 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Organic cause of delirium include

Options :

1. Multiple sclerosis
2. Epilepsy
3. Carcinoid syndrome
4. All options correct

Question Number : 58 Question Id : 480915258 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which of the following is NOT a feature of tribe

Options :

1. Common religion
2. Blood relationship

3. Common language

4. Exogamy

Question Number : 59 Question Id : 480915259 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The characteristics of a rural society

Options :

1. Too much nearness to nature
2. Agriculture is the main occupation
3. Self-dependence and reliance
4. All options correct

Question Number : 60 Question Id : 480915260 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Who is the founder of modern sociology?

Options :

1. Auguste Comte
2. JF Cuber
3. Mac Iver
4. Giddings

Question Number : 61 Question Id : 480915261 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which of the following can lead to greenish discolouration of the amniotic fluid?

Options :

1. Lanugo
2. Hydramnios
3. Vernix
4. Meconium

Question Number : 62 Question Id : 480915262 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Postpartum hemorrhage is loss of blood which is more than

Options :

1. 800 ml
2. 100ml
3. 500ml
4. 900ml

Question Number : 63 Question Id : 480915263 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Maternal alpha fetoprotein level is 30 ng / ml. Which among the following condition may be present in fetus?

Options :

1. Meningocele
2. Meningomyelocele
3. Meningocele and Meningomyelocele
4. Down Syndrome

Question Number : 64 Question Id : 480915264 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Lateral position is given to pregnant mothers in order to avoid

Options :

1. Supine hypotension
2. Orthostatic hypotension
3. Aspiration
4. Venous drainage

Question Number : 65 Question Id : 480915265 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Drug of choice for the management of eclampsia is

Options :

1. Sodium nitroprusside
2. Magnesium sulphate
3. Dopamine
4. Labetalol

Question Number : 66 Question Id : 480915266 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

What is Velamentous placenta?

Options :

1. Fibrous ring present at the margin of placenta
2. Placenta is thin and large
3. Cord is attached to the membrane
4. Cord is attached to the margin of the placenta

Question Number : 67 Question Id : 480915267 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

"Snowstorm" pattern on ultrasound with no fetus or gestational sac is the characteristic of

Options :

1. Eclampsia
2. Placenta previa
3. Abruptio placenta
4. Hydatidiform mole

Question Number : 68 Question Id : 480915268 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which of the following instructions should a nurse give to a client who is 26 weeks pregnant and complains of constipation?

Options :

1. Encourage her to increase her intake of roughage and to drink atleast six glasses of water per day

4. Suggest the use of an over-the-counter stool softner

Question Number : 69 Question Id : 480915269 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which one is NOT a cause of conduct disorder like deceitfulness, serious violation of rules, fire settings among children?

Options :

1. Genetic
2. Neurological deficit
3. Poverty
4. Low Intelligence

Question Number : 70 Question Id : 480915270 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Eating of substances other than food is

Options :

1. Substance abuse
2. Bulimia
3. Pica
4. Anorexia nervosa

Question Number : 71 Question Id : 480915271 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

A child is diagnosed with Wilm's tumour. During assessment the nurse expects to detect

Options :

1. Gross hematuria
2. Dysuria
3. Oliguria
4. Abdominal mass

Question Number : 72 Question Id : 480915272 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Most common diagnostic test performed in a child who is suspected to be suffering from meningitis is

Options :

1. MRI
2. X-ray spine
3. CT scan
4. Lumbar puncture

Question Number : 73 Question Id : 480915273 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

During infancy, play therapy is important in

Options :

1. Physical development
2. Social development
3. Psychological development
4. Emotional development

Question Number : 74 Question Id : 480915274 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Which among the following activity is compromised in a newborn baby with cleft lip?

Options :

1. Sucking
2. Swallowing
3. Respiration

4. Facial expression

Question Number : 75 Question Id : 480915275 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Question Number : 77 Question Id : 480915277 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

The concept of health promotion and the related activities lead to

Options :

1. Better treatment of a problem
2. Critical awareness and life style changes
3. Adoption of prophylactic services
4. Better health services usage

Question Number : 78 Question Id : 480915278 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Temporary hardness of water can be removed by

Options :

1. Boiling
2. Filtering
3. disinfecting
4. Chlorination

Question Number : 79 Question Id : 480915279 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

What is the most hygienic method of disposal of solid wastes?

Options :

1. Composting
2. Incineration
3. Burial
4. Manure pits

Question Number : 80 Question Id : 480915280 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Epidemiology includes the measurement of which of the following?

Options :

1. Measurement of frequency of disease
2. Measurement of distribution of disease
3. Measurement of determinants of disease
4. All options correct

Question Number : 81 Question Id : 480915281 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

BCG vaccine is administered to prevent

Options :

1. Tuberculosis
2. Measles
3. Typhoid
4. Mumps

Question Number : 82 Question Id : 480915282 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Dengue fever is otherwise called as

Options :

1. Enteric fever
2. Break bone fever
3. Q-fever
4. Brain fever

Question Number : 83 Question Id : 480915283 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Spoon-shaped nails are seen in

Options :

1. Iron deficiency anemia
2. Megaloblastic anemia
3. Sickle cell anemia
4. Pernicious anemia

Question Number : 84 Question Id : 480915284 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

ESI Act came in the year

Options :

1. 1975
2. 1996
3. 1976
4. 1990

Question Number : 85 Question Id : 480915285 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

In control of inventories, VED refers to

Options :

1. Vastly Error Done
2. Vulnerable End Disease

3. Very Escaping Determinant

4. Vital Essential Desirable

Question Number : 86 Question Id : 480915286 Question Type : MCQ Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Lobbying refers to the attempt to influence

Options :

1. Economic decisions
2. Political decisions
3. Social decisions
